Individualized Education Program: Conduct Disorder

Sample IEP · Grade 5 · Student name and personal details removed · Katherine Conklin

Grade: 5th

Present Levels of Academic Achievement and Functional Performance (PLAAFP)

The student is a 10-year-old diagnosed with Conduct Disorder (CD). He demonstrates strengths in verbal communication, creativity, and problem-solving in non-traditional formats. However, he exhibits difficulty with impulse control, following classroom rules, respecting authority figures, and managing peer relationships. He has a history of engaging in disruptive behaviors, including defiance, aggression, and inappropriate language, which impact his academic performance and social interactions.

Academically, the student performs at grade level in most subjects when engaged but struggles with task completion and maintaining focus. His behavioral challenges often interfere with his ability to participate effectively in the learning environment.

Annual Goals

Behavioral/Social-Emotional Goal

By the end of the IEP term, the student will demonstrate improved self-regulation skills by utilizing coping strategies (e.g., deep breathing, counting to ten, using a break card) to reduce disruptive behaviors, achieving a 50% reduction in behavioral referrals as measured by teacher reports and behavioral tracking data.

Academic Goal

By the end of the IEP term, the student will complete 80% of assigned classwork across all subjects with teacher support and behavior management strategies in place, as measured by teacher records and student work samples.

Social Skills Goal

By the end of the IEP term, the student will engage in positive peer interactions (e.g., turn-taking, using appropriate language, conflict resolution) in structured settings at least 75% of the time, as measured by teacher observations and peer feedback.

Accommodations and Modifications

- Preferential seating away from distractions and near positive role models.
- Structured and predictable routines with clear expectations.
- Frequent breaks and access to a designated calm-down area.
- Positive reinforcement for appropriate behavior.
- Use of a behavior contract with clear consequences and rewards.

- Reduced workload or modified assignments when needed to prevent frustration.
- Daily check-ins with a designated staff member (counselor, mentor, or special education teacher).
- Social skills instruction through role-playing and modeling.

Special Education and Related Services

- Behavioral Support Services: Weekly counseling sessions with a school counselor or behavior specialist to work on emotional regulation and coping strategies.
- Social Skills Training: Small group sessions focusing on peer interaction, conflict resolution, and perspective-taking.
- Classroom Support: Special education teacher or paraprofessional support in general education settings as needed.
- Collaboration with Family: Regular communication with parents/guardians regarding progress and strategies for reinforcement at home.

Behavior Intervention Plan (BIP) Summary

- Identified Behaviors: Defiance, verbal aggression, physical aggression, noncompliance with rules.
- Triggers: Changes in routine, perceived unfair treatment, peer conflicts, academic frustration.
- Proactive Strategies: Clear and consistent expectations, structured transitions, choice-making opportunities, social-emotional learning activities.
- Interventions: Use of break cards, de-escalation strategies, positive reinforcement, and logical consequences.
- Crisis Plan: Immediate removal from the situation if behavior becomes a safety concern, followed by reflection and restorative conversation.

Progress Monitoring and Review

- Behavior tracking data will be reviewed bi-weekly.
- Teacher and support staff will provide anecdotal records on progress.
- Student self-reflection sheets will be incorporated into progress reviews.
- IEP team will meet quarterly to assess progress and make necessary adjustments.

Parent/Guardian and Student Involvement

Parents/guardians will receive regular updates and be encouraged to participate in reinforcement strategies at home. The student will be involved in setting personal goals and self-monitoring progress where appropriate.

This IEP is designed to provide the student with the support necessary to succeed academically and behaviorally while fostering positive social interactions.
